

April 26, 2022

The Honorable Brian Schatz
Chair, Appropriations Subcommittee on
Transportation, Housing and Urban
Development
U.S. Senate
Washington, D.C. 20510

The Honorable Susan Collins
Ranking Member, Appropriations
Subcommittee on Transportation, Housing
and Urban Development
U.S. Senate
Washington, D.C. 20510

The Honorable David E. Price Chair,
Appropriations Subcommittee on
Transportation, Housing and Urban
Development
U.S. House of Representatives
Washington, D.C. 20515

The Honorable Mike Quigley
Ranking Member, Appropriations
Subcommittee on Transportation, Housing
and Urban Development
U.S. House of Representatives
Washington, D.C. 20515

Dear Chairman Schatz, Ranking Member Collins, Chairman Price, and Ranking Member Quigley:

We, the undersigned 429 national, state, and local organizations, write to express our strong support for the Housing Opportunities for Persons with AIDS (HOPWA) program in the Transportation-HUD appropriations bill. We implore the House of Representatives and Senate to fund HOPWA at least at \$600 million in Fiscal Year (FY) 2023. Last year's enacted amount of \$450 million resulted in losses of over \$15 millions to jurisdictions throughout the country, thereby jeopardizing the housing of over 1700 very low income people living with HIV/AIDS.

This is unacceptable.

HIV/AIDS is a communicable virus/disease. Those who lack stable housing, and those without homes, are 20% less likely to achieve viral suppression, thereby being able to transmit HIV to others. Without addressing housing needs for low income people living with HIV, the United States plan to end the HIV epidemic becomes null. Since the announcement of the *Ending the HIV Epidemic: A Plan for America*, leaders have acknowledged that the United States has the medical tools necessary to end the HIV Epidemic, but have ignored the housing needs that are necessary to achieve these goals. Inadequate funding of the only federal housing program solely dedicated to addressing the housing needs of individuals with HIV/AIDS will be a barrier to the Ending the *HIV Epidemic: A Plan for America* initiative.

In 2016, Congress passed legislation that included an update to the HOPWA formula which has been fully

Resources and more information can be found on our website at www.nationalaidshousing.org/advocacy2023

National AIDS Housing Coalition

enacted for FY22. While we applaud the change to the HOPWA formula, Congress must put the resources into the HOPWA program to make it effective.

Advocates are calling for an investment of \$600 million into the HOPWA program to ensure that almost all current grantees are at least brought back to their original funding levels and to begin to address the real need of thousands of low-income persons living with HIV. In the United States, an estimated 100,000 people with HIV/AIDS are experiencing homelessness, with an additional estimated 300,000 people living with HIV/AIDS needing housing assistance. For the past few years, HOPWA has only been able to serve about 55,000 households, **but with the Biden administration's proposal for FY23 at \$455 million, that number would drop by 10,000 households at a time when we need housing more than ever.**

For 29 years, HOPWA has provided a national safety net for very low-income people living with HIV/AIDS. The program provides competitive and formula grants to all fifty states, the District of Columbia, Puerto Rico, and the Virgin Islands. Through these grants, cities and states design and deliver community-based, cost effective housing and supportive services to people living with HIV/AIDS. HOPWA is critical because housing remains the greatest unmet need for people living with HIV/AIDS. Stable housing, like the housing provided by HOPWA grantees, leads to better health outcomes for those living with HIV. For people living with HIV, a better health outcome means viral suppression. An individual who is virally suppressed cannot transmit the HIV virus to another person, thereby ensuring the health of their entire community. Further, HOPWA leverages income from local communities. According to HUD, the HOPWA program leveraged \$1,129,414,685.08 from state and local jurisdictions in the last program year.

HIV does not affect all Americans equally, making the need for adequate HOPWA funding in certain communities more important than ever. 93% of HOPWA funds serve extremely-low to very-low-income households. During the last program year, 10% of HOPWA's homeless beneficiaries were veterans and another 41% were considered chronically homeless. The program placed 22,984 new individuals into housing while providing housing for 49,880 households, provided 105,071 individuals with supportive services, and 111,228 individuals with housing information services. 66% of HOPWA funds are serving the BIPOC community.

It has been a priority by the current and past administrations to end the HIV/AIDS epidemic in America, and if congress and the President are serious about this bipartisan goal we implore you to fund HOPWA at least at \$600 million for FY23.

If you have any questions about this letter, please contact Lauren Banks, Executive Director, at the National AIDS Housing Coalition (LaurenK@nationalaidshousing.org).

Thank you,

National AIDS Housing Coalition (DC)
